### **DETAILED ACTION**

1. Applicant's arguments filed August 1, 2008 have been fully considered but they are not persuasive. Applicants amendment to claim 1 to include "or exposure to mechanical stresses", distinguishes over Hayano in view of Ryan, however the amendment introduces new matter into the claims for the reasons described below.

#### ***Claim Rejections - 35 USC § 112***

2. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment adds the terms "or exposure to mechanical stresses" to claim 1, however the specification describes the liquid exerting a tensile force which stabilizes the course of the coated fabric tube (pg. 2 second paragraph). Tensile force is a mechanical stress and therefore the coated fabric tube can not travel through the precipitation bath without mechanical stresses.

#### ***Allowable Subject Matter***

3. Claims 10 and 11 are allowed.

4. The following is an examiner's statement of reasons for allowance:

- Claim 10 incorporates the limitations of Claim 4 which was indicated to contain allowable subject matter in the previous office action. Hayano (the closest prior art) makes no mention of controlling bath temp or solvent concentration in the bath or the method of providing or removing the precipitation liquid from the precipitation

Art Unit: 1791

bath, however Ryan suggest heating the coagulation carrier liquid and feeding it from the top of the secondary tube (col. 2 lines 13-18). Neither of these references teaches having a "partial stream" of precipitation agent exiting through a nozzle and "other part of the supplied precipitation agent is drawn off from the pipe at a different location".

- Claim 11 incorporates the limitations of Claim 6 which was indicated to contain allowable subject matter in the previous office action. Neither Hayano nor Ryan teach further conditioning of the coated fiber without mechanical contact. Ryan does show further conditioning of the fiber however the fiber is passed through the secondary bath on rollers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1791

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
